PROFESSIONAL SUMMARY

Front-End Developer at P&P Infotech with 4+ years of experience building high-performance, responsive React applications, customized trading charts, and secure document signing systems.

PROFESSIONAL EXPERIENCE

P&P Infotech - Front-End Developer [December 2021 - Present]

- SMART-ALGO (v-2.0): Engineered algorithmic option chain and strategy builder. Built modular user interfaces, preset themes, and achieved 3x rendering speed increase via DOM rendering audits.
- COPY TRADING: Constructed low-latency trade replication system connecting Master and Child client portals.
- E-SIGN: Developed secure document signature platform integrated with SurePass API for KYC.
- SERVICE-VAULT: Programmed localized workflow management dashboard supporting multiple languages.
- SMART-ALGO (v-1.0): Designed stock price trigger indicator systems for automatic trade execution.

TECHNICAL SKILLS

Languages & Core: ReactJS, Redux, Redux-Toolkit, JavaScript, HTML5, CSS3

UI Frameworks: Tailwind CSS, Bootstrap 4/5, Responsive Grid Layouts

Back-End & Databases: Node.js (Familiar), MongoDB, MySQL, Redis, WebSockets

Tools & Services: SurePass API, Broker APIs, Git, GitHub, Postman, Thunder Client

EDUCATION

Bachelor of Computer Application (BCA)

Seeta Devi College (Bhilwara) - Graduated July 2019
